

ENC 1002
COPY 1 OF 2

June 5, 1956

George:

In accordance with our conversation of May 18, 1956, we have granted permission to Dr. Baker to disclose the designs of the 100" and 300" Collimators to the Amateur Telescope Makers at Harvard Observatory.

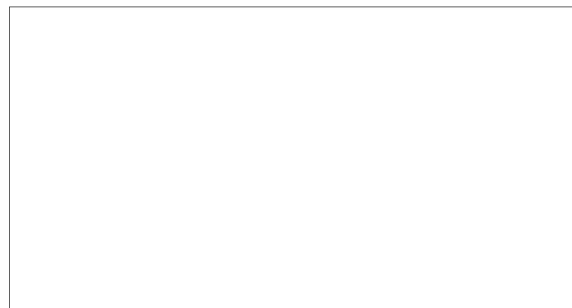

Your prompt attention in granting this request was greatly appreciated, and to complete your file on this matter, I am enclosing copies of the correspondence exchanged on this subject between Mr. Perkin and Dr. Baker.
